Nama : Rega Anggilia Maharani

NIM : 12030123130146

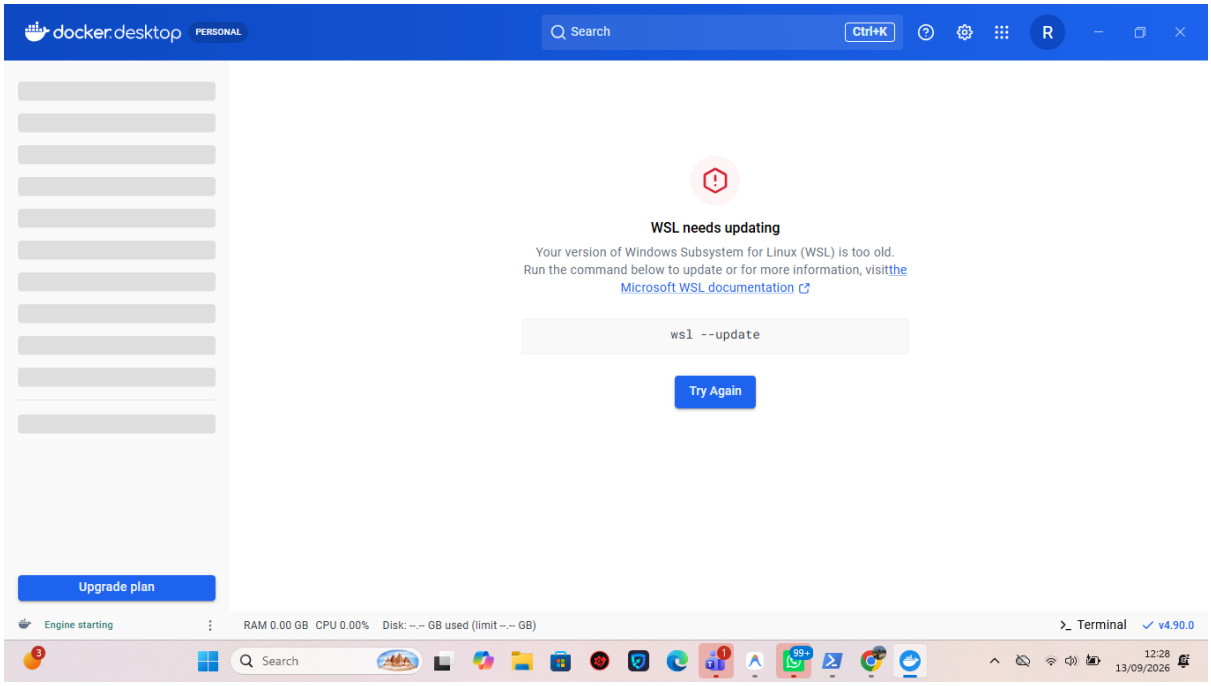

Mata Kuliah : ERP (B)

**Laporan Praktikum ERP: Implementasi ERPNext Industri Manufaktur Menggunakan Docker Desktop, Google Antigravity, dan Gemini NotebookLM**

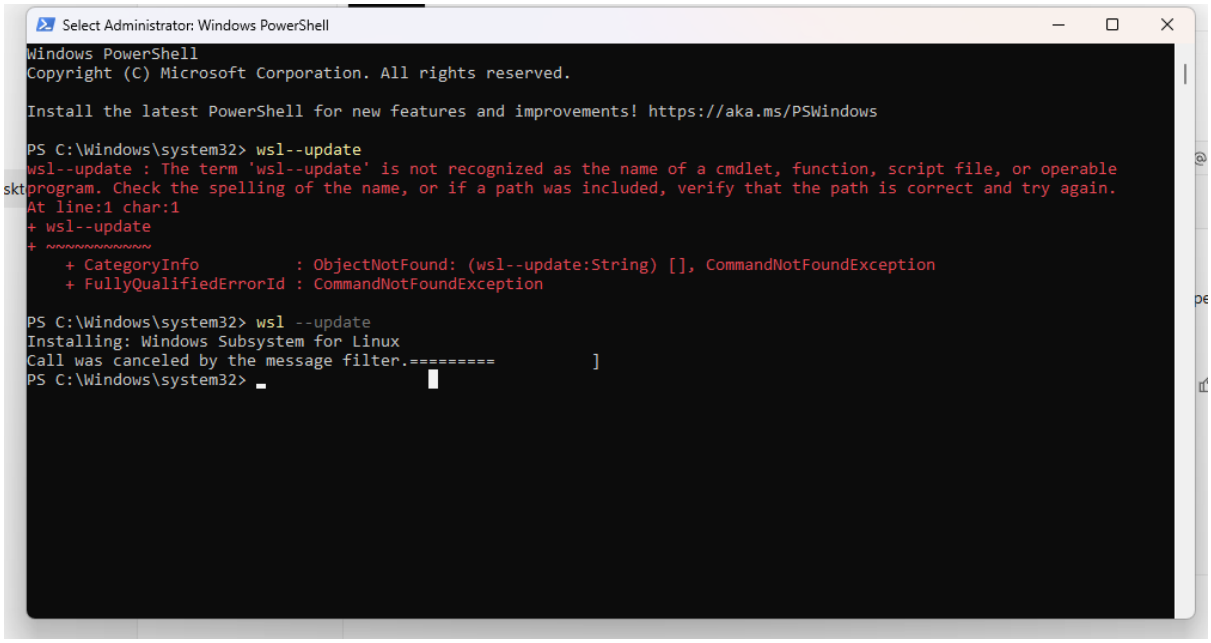

1. Mengunduh dan memasang aplikasi Google Antigravity serta Docker Desktop, kemudian melakukan proses login hingga muncul tampilan utama aplikasi.

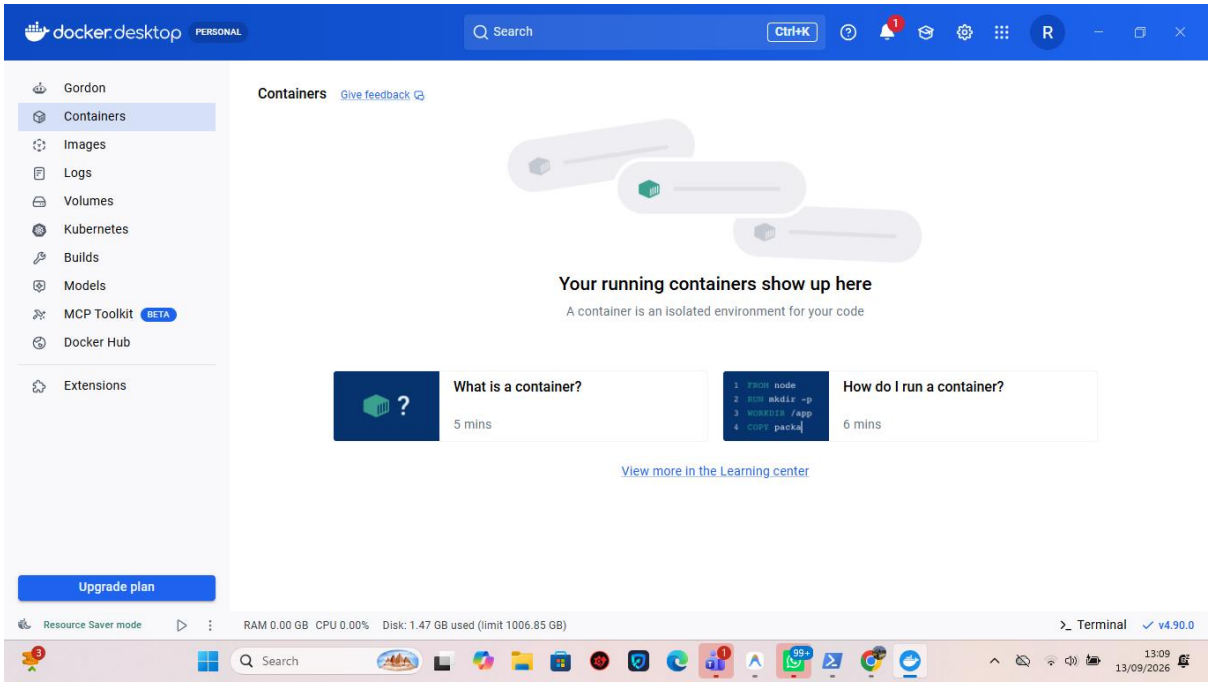

2. Jika muncul pesan error / peringatan (seperti 'Virtualization support not detected' atau 'WSL needs updating') dan status Docker di bagian bawah menunjukkan 'Engine Starting', gunakan instruksi pada Google Antigravity untuk menyelesaikan masalah penanganan environment tersebut.

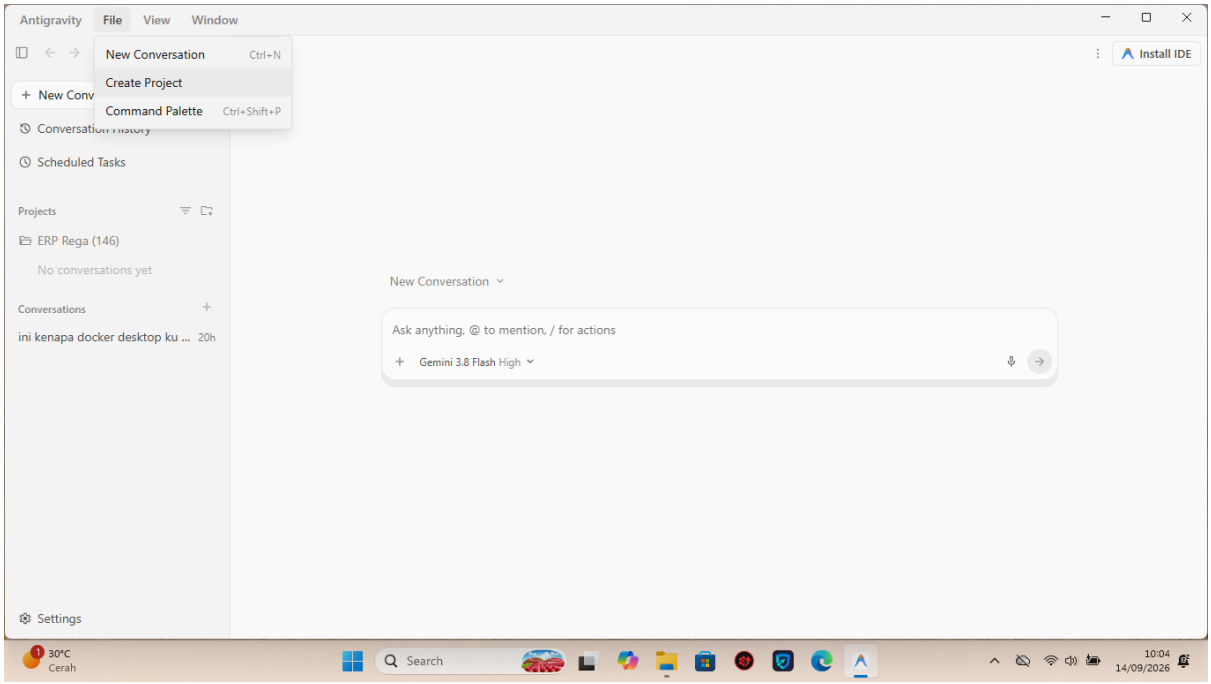

3. Menjalankan perintah pembaharuan WSL (wsl --update) melalui Windows PowerShell (Run as Administrator) sesuai petunjuk perbaikan.

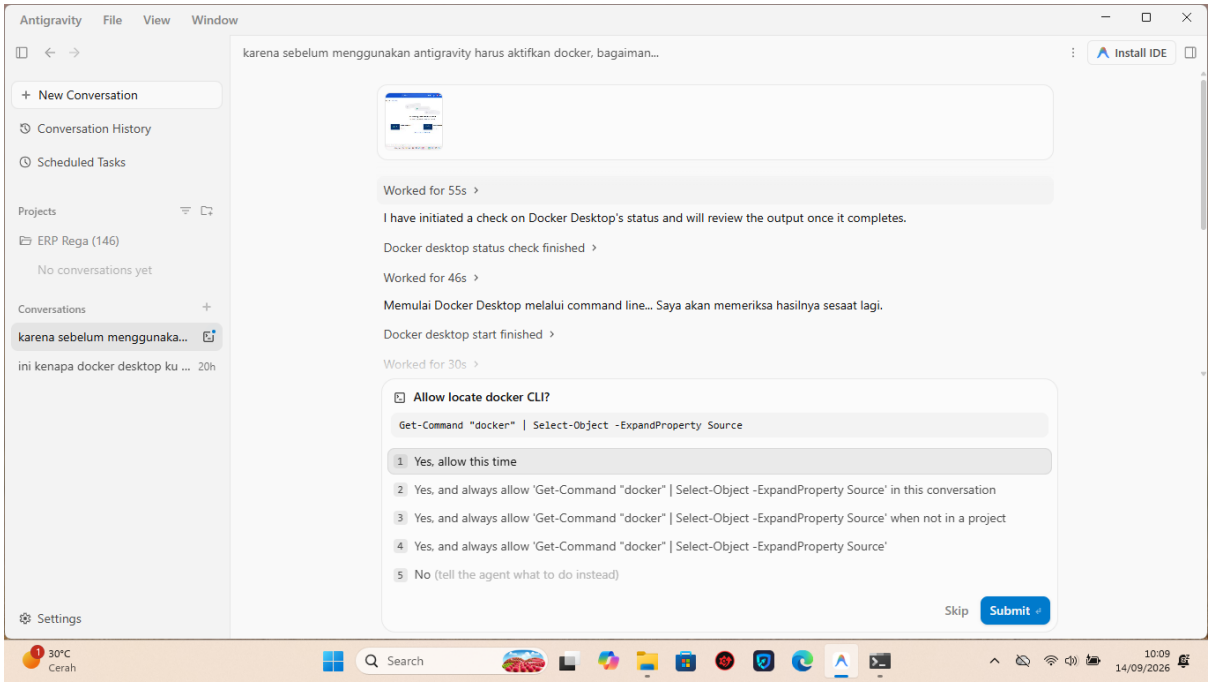

4. Jika tampilan telah berubah menjadi seperti pada gambar, artinya Docker telah bisa digunakan.

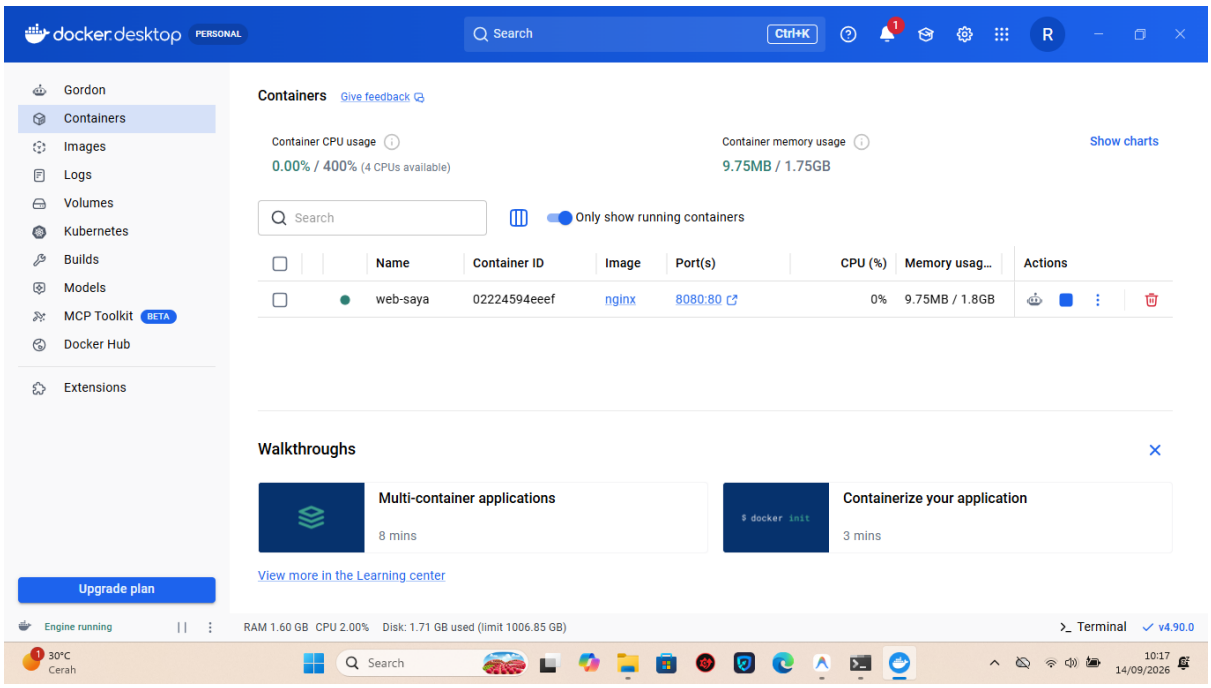

5. Buka Antigravity kembali, klik File, Create Project, beri nama “ERP”.

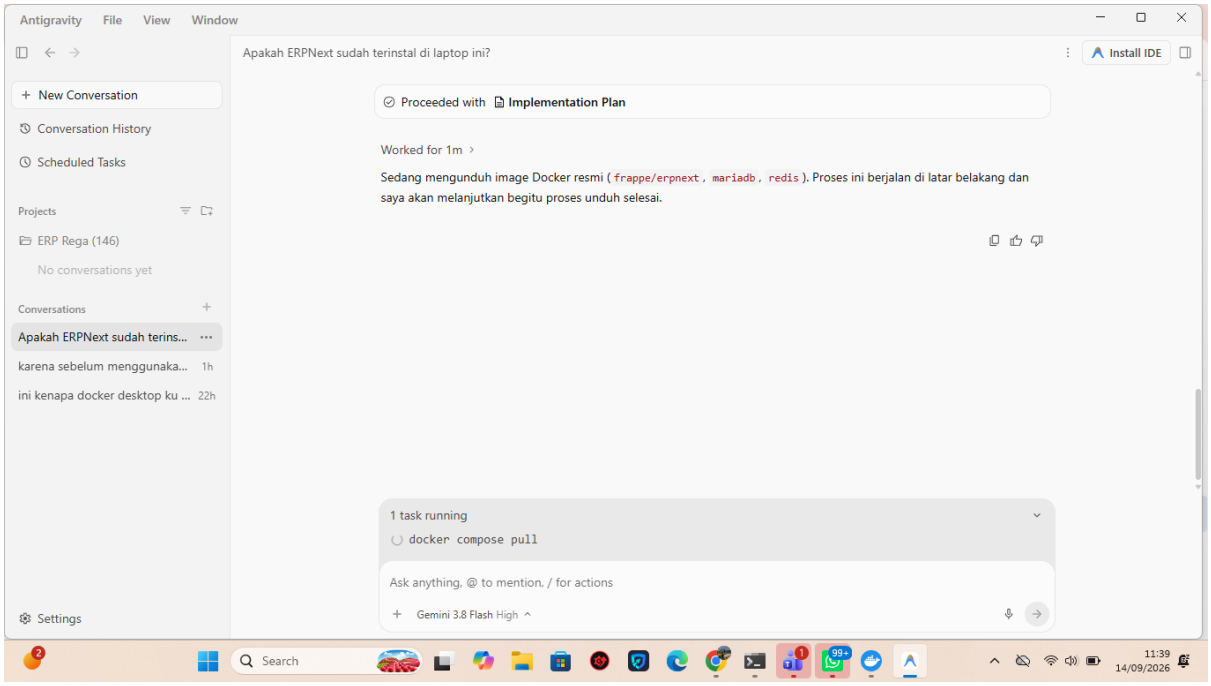

6. Memberikan instruksi (prompt) kepada Antigravity untuk memeriksa dan mengaktifkan Docker Engine serta mengonfigurasi CLI.

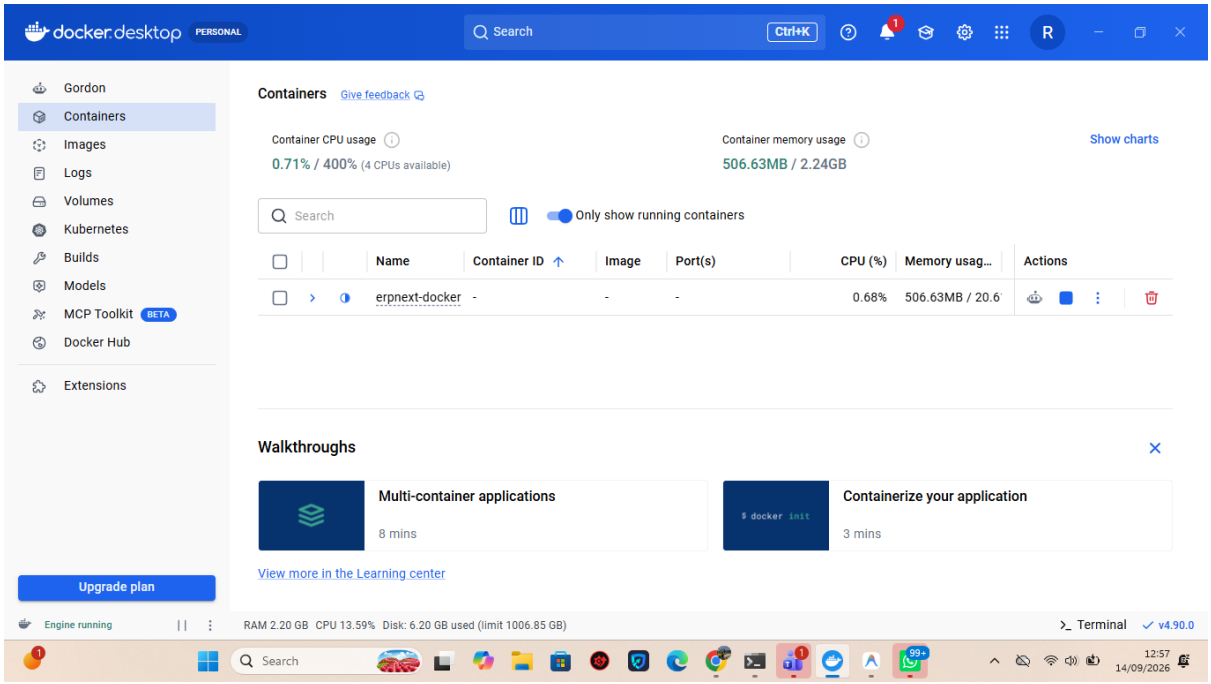

7. Berikut hasil Docker yang telah aktif.

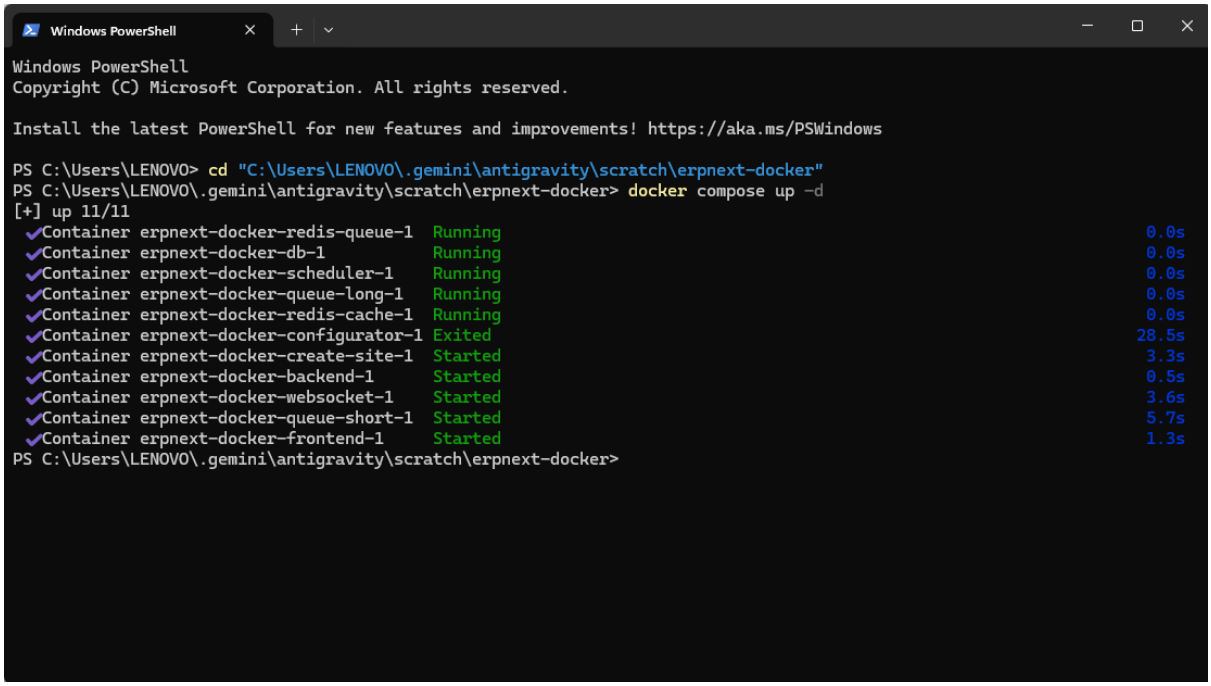

8. Minta Antigravity mengunduh *image* ERPNext, MariaDB, dan Redis.

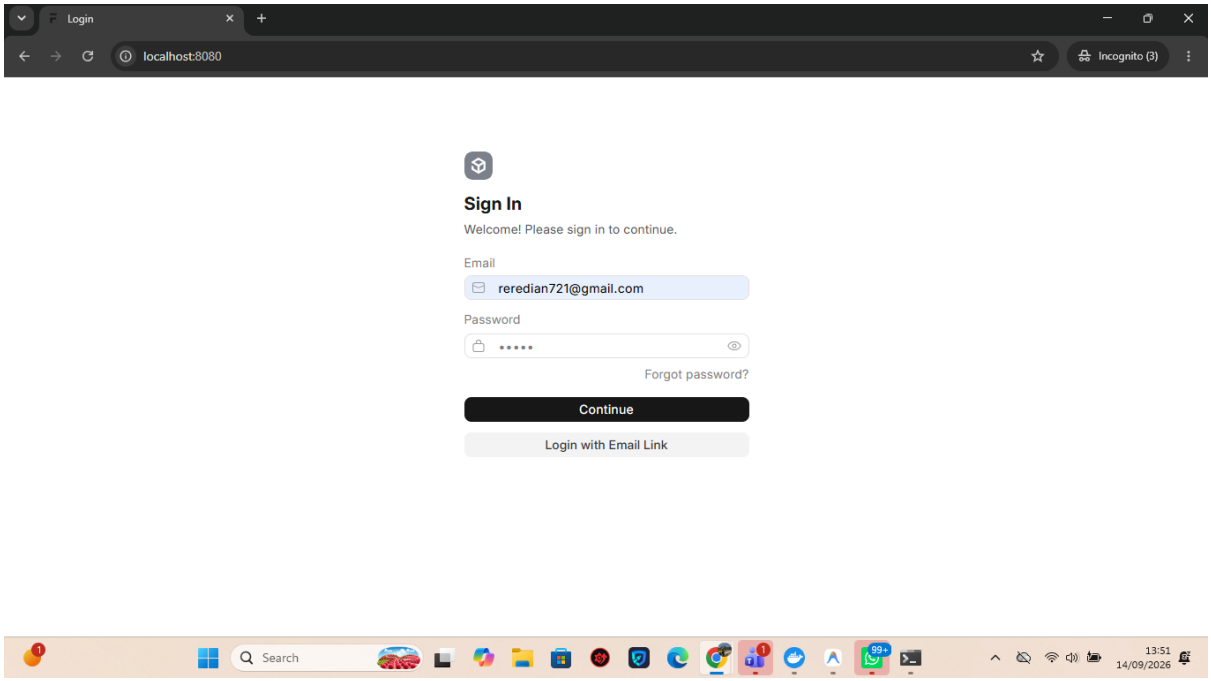

9. Pastikan *environment* erpnext-docker sudah terdaftar di Docker Desktop.

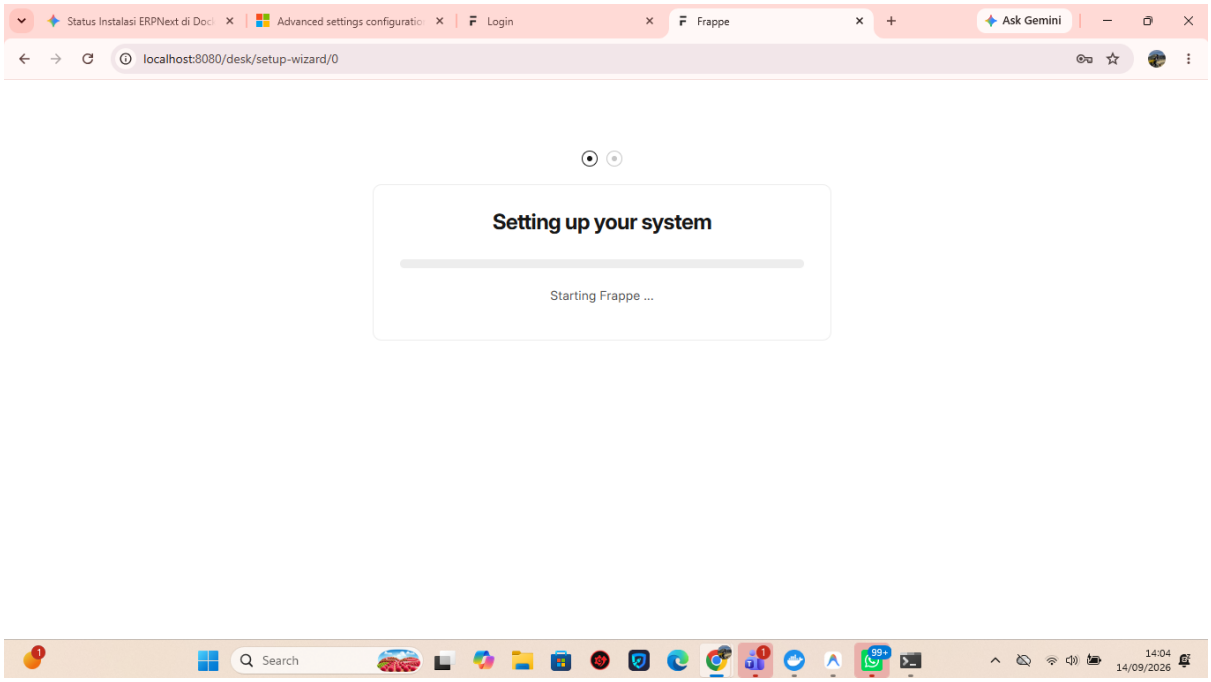

10. Jalankan perintah docker compose up -d lewat PowerShell sampai semua servis aktif.

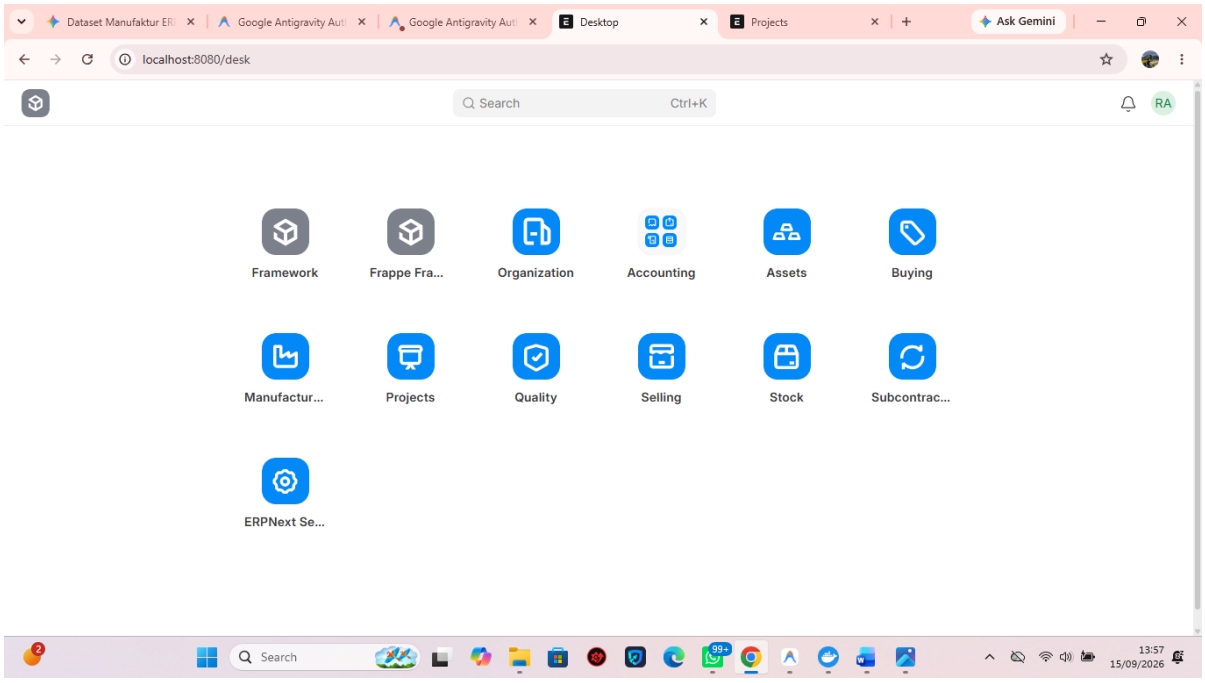

11. Akses URL http://localhost:8080 pada browser lalu masuk menggunakan akun ERPNext yang telah dikonfigurasi.

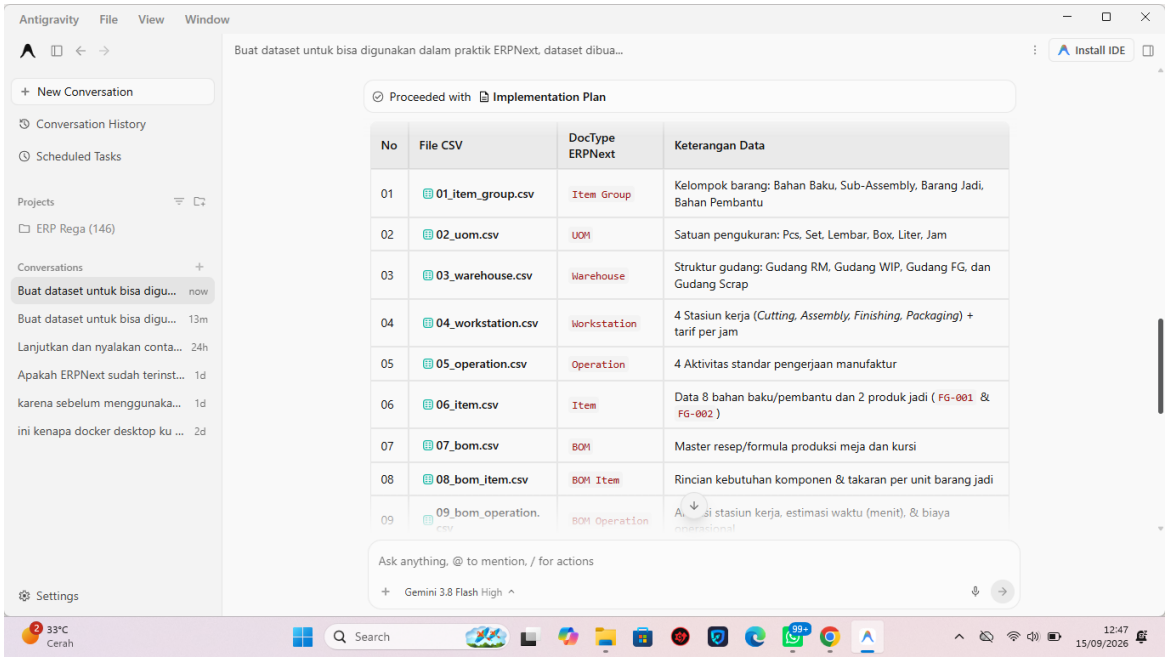

12. Tunggu proses *setup* awal sistem Frappe selesai.

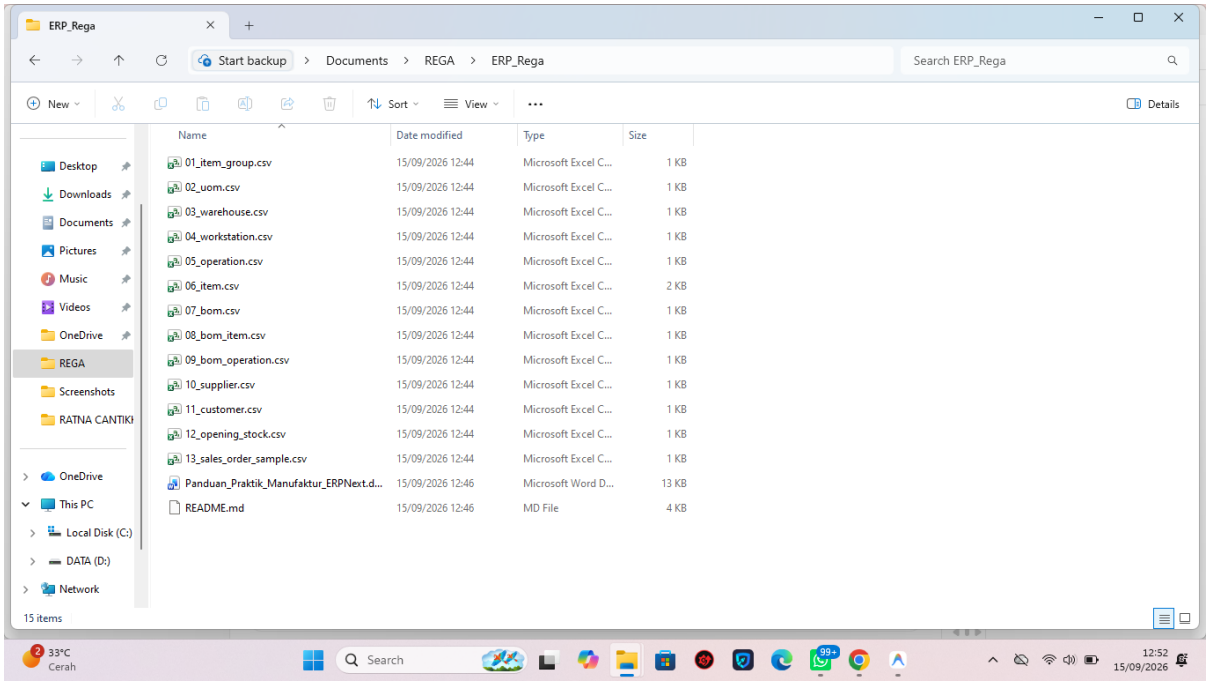

13. Halaman *dashboard* utama ERPNext berhasil terbuka dan siap dipakai.

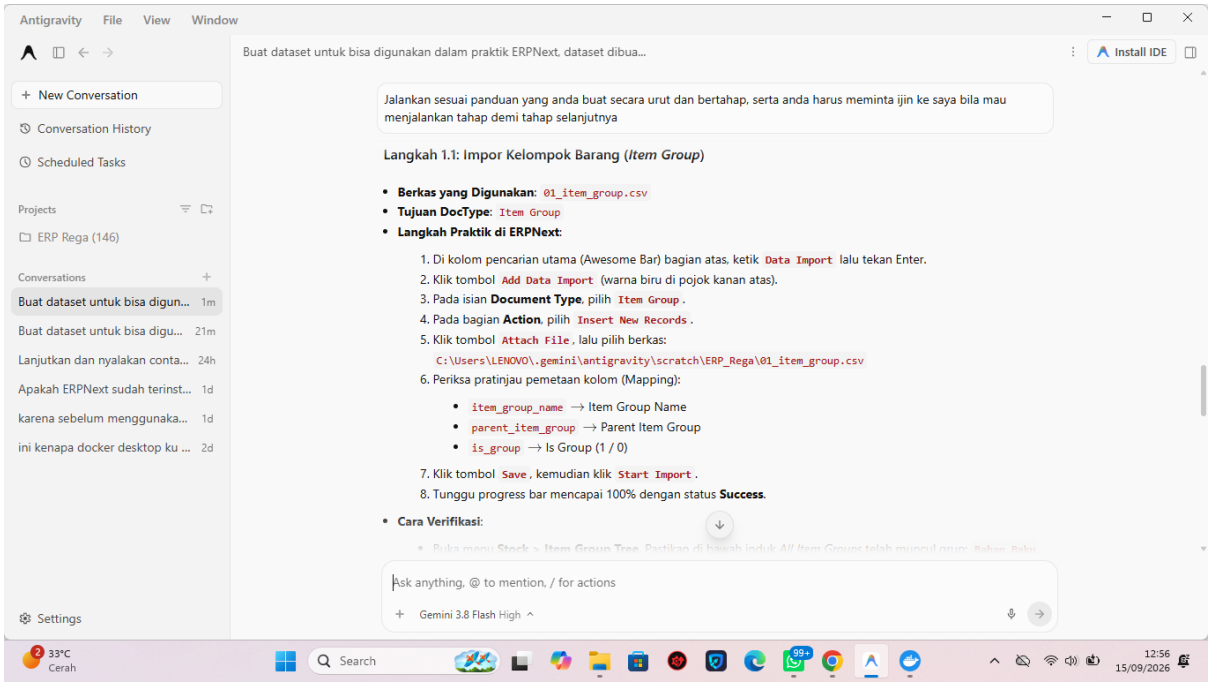

14. Buat struktur dataset manufaktur ERPNext menggunakan Antigravity.

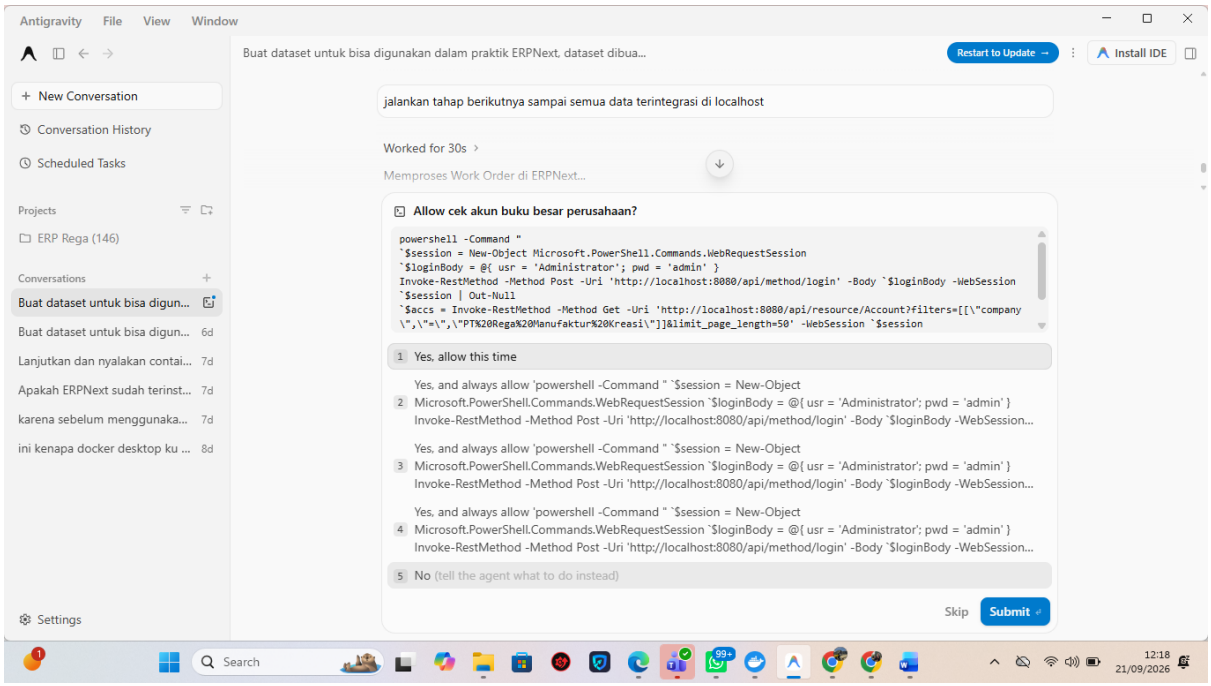

15. Simpan dan pastikan seluruh file CSV dataset sudah rapi di folder.

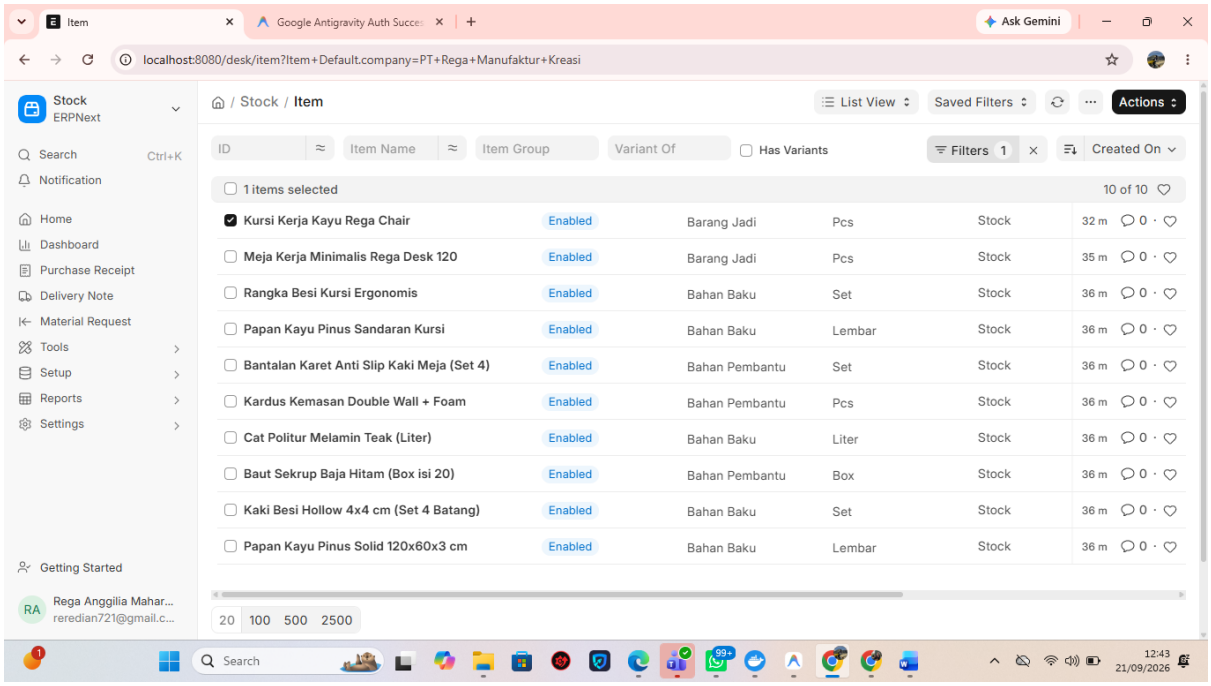

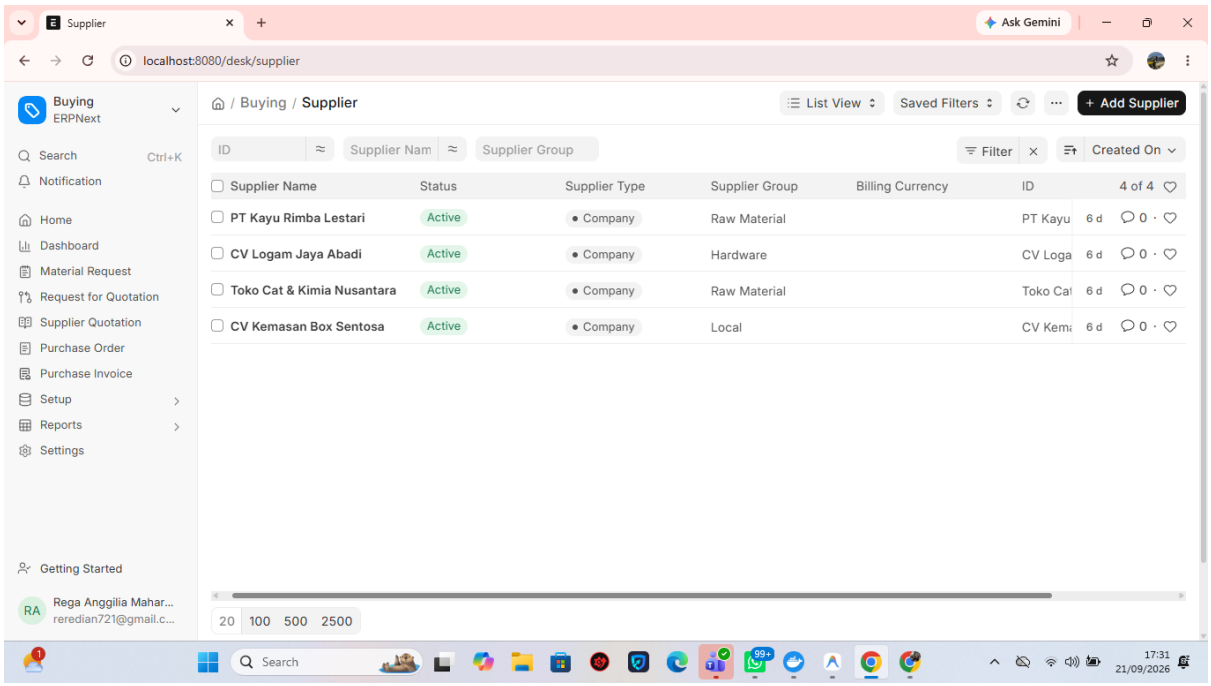

16. Prompt: Harap jalankan seluruh proses secara sistematis dan bertahap sesuai panduan. Sebelum melangkah ke tahap selanjutnya, Anda harus meminta izin kepada saya terlebih dahulu. Silakan jalankan tahap demi tahap sampai selesai.

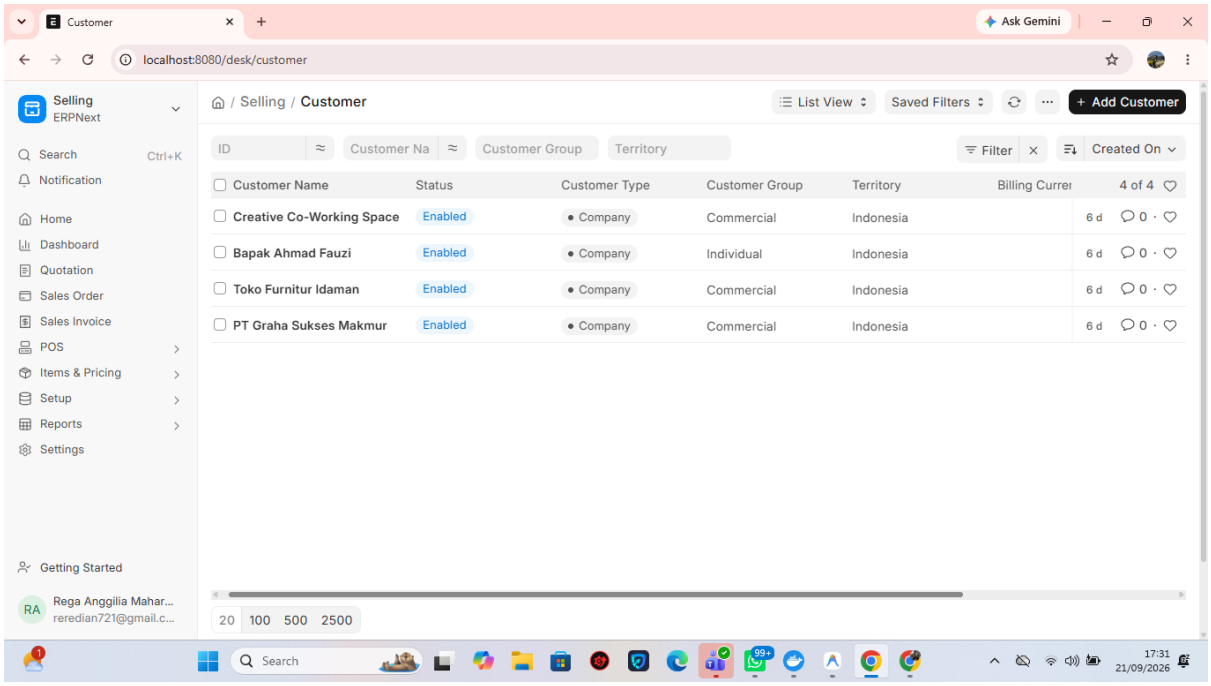

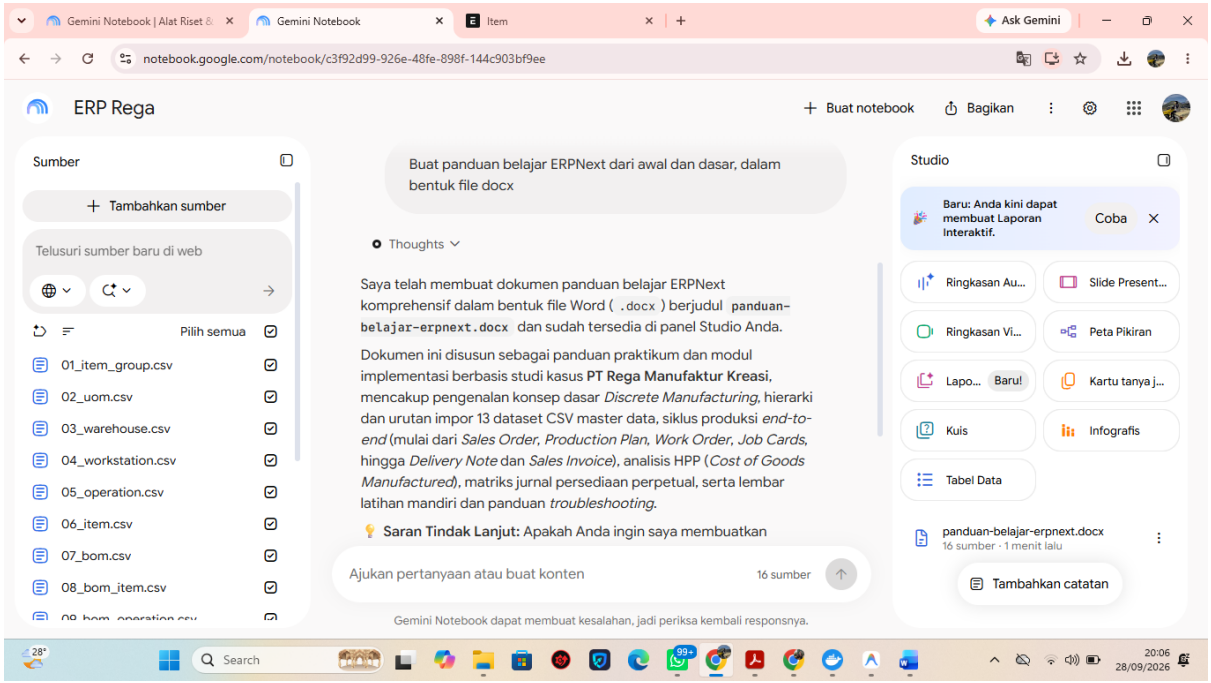

17. Berikut cek tampilan localhost ERPNext setelah semua tahapan dijalankan.

18. Buka NotebookLM sebagai AI yang akan diintegrasikan, dimulai dengan memasukkan master data ERPNext sebagai sumber utama, lalu ketik prompt berikut untuk meminta dibuatkan Panduan Belajar ERPNext.

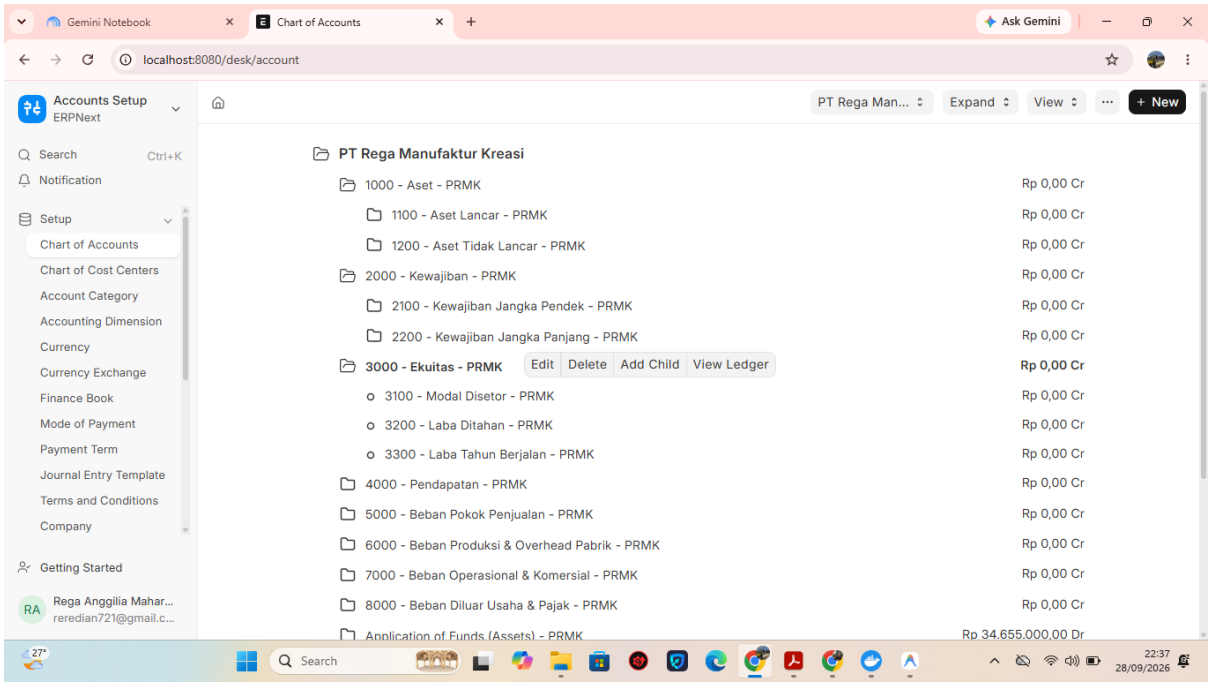

19. Selanjutnya prompt kembali pada NotebookLM untuk dibuatkan Kode Akun industri manufaktur guna diterapkan pada ERPNext (file dalam bentuk excel).

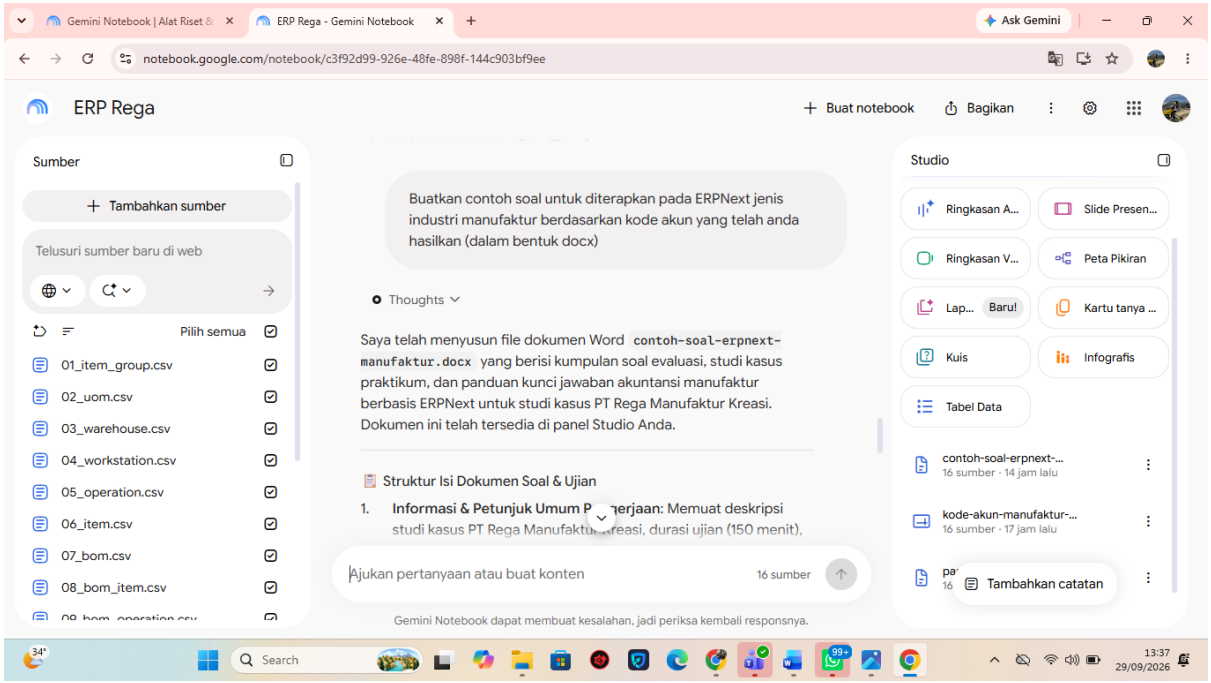

20. Minta Antigravity untuk memasang kode akun tersebut pada localhost ERPNext.

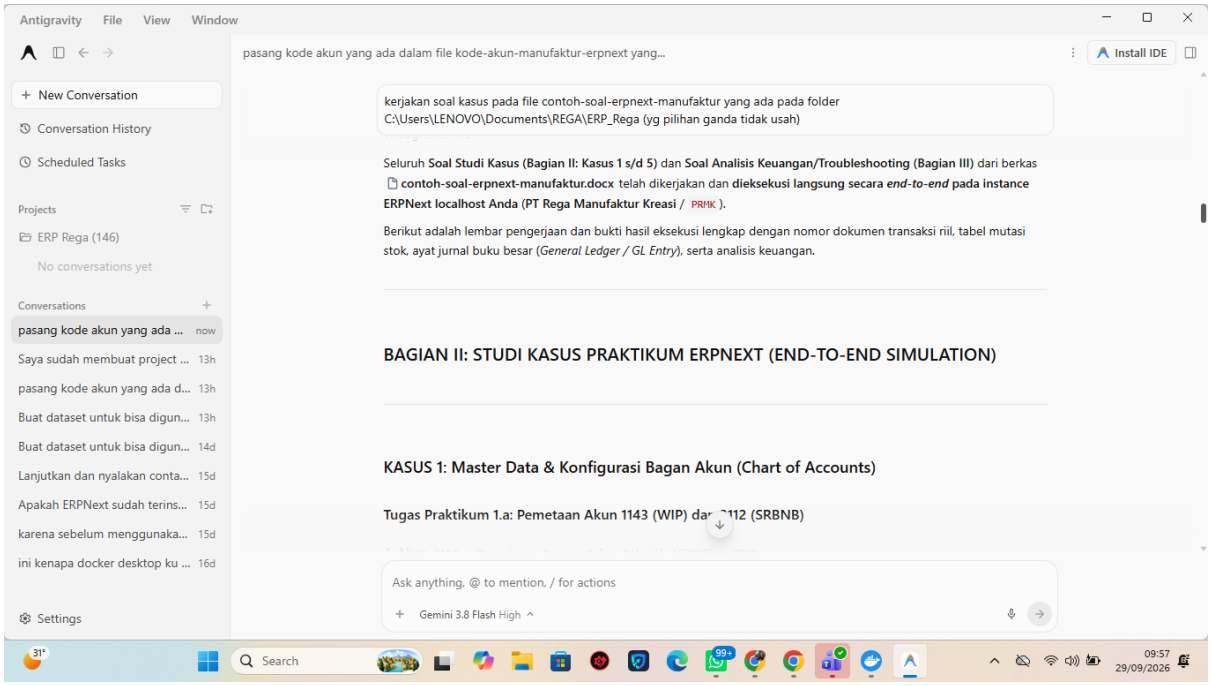

21. Pastikan kode akun telah terpasang dengan membuka Accounts Setup pada ERPNext.

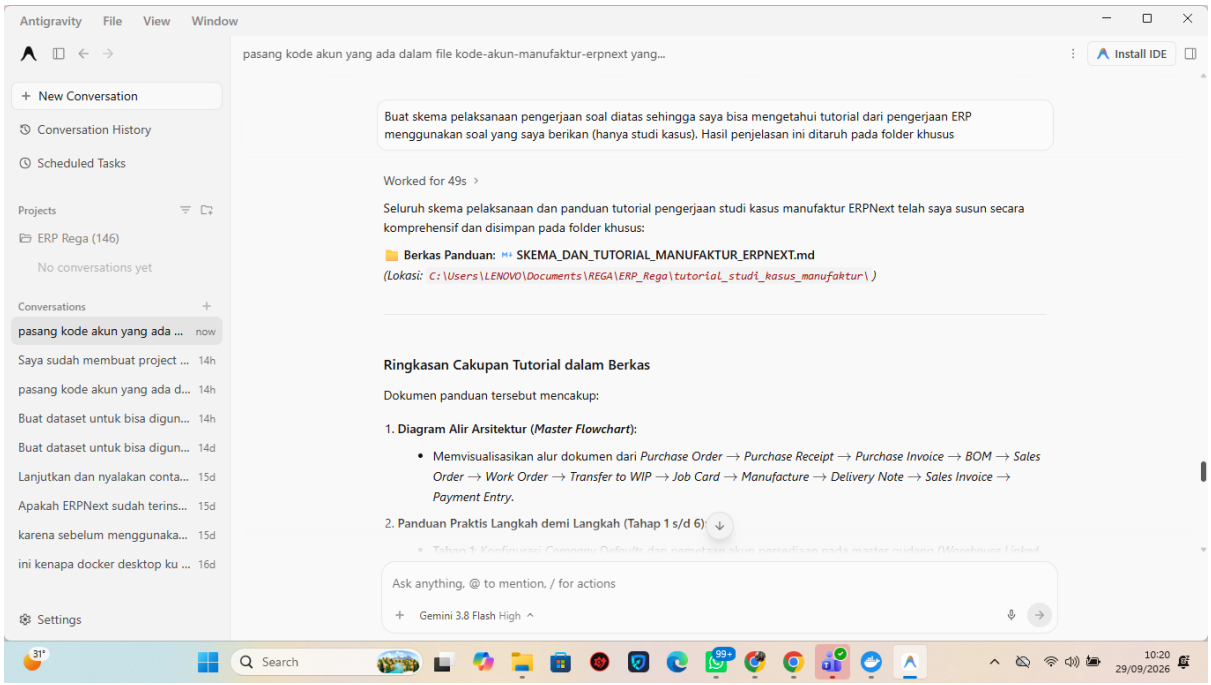

22. Prompt kembali pada NotebookLM untuk minta dibuatkan soal dan jawaban mengenai ERPNext industri manufaktur.

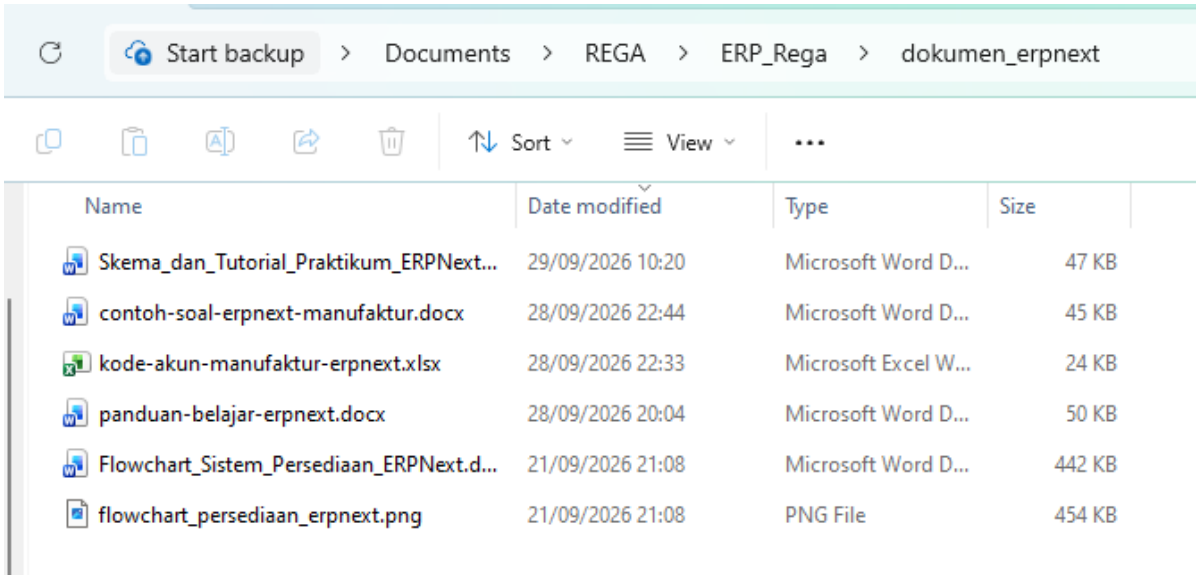

23. Minta Antigravity mengerjakan soal-soal kasus yang ada ke localhost ERPNext.

24. Setelah semua soal terjawab, prompt lagi dan minta diberikan file skema pelaksanaan pengerjaan yang telah dilakukan Antigravity.

25. Berikut dokumen hasil pelaksanaan ERPNext tersebut (flowchart, panduan belajar, contoh soal & jawaban, serta skema dan tutorial praktikum ERPNext).
